PROFILE

As a dedicated and adaptable software engineer, I bring hands-on experience in coding, testing, and documentation, thriving in dynamic environments. My expertise in HTML, CSS, JavaScript, Node.js, and databases like MongoDB aligns new cutting-edge technology. Passionate about continuous learning and collaboration, I aim to deliver high-quality, scalable, and reliable solutions

WORK EXPERIENCE

EDBA ACADEMY

24 June-Present

MERN Stack Developer

- Industry-relevant experience.
- Hands-on with real-time projects.
- Working with various new technologies.

TECHQ KONNECT TECHNOLOGIES PVT LTD

23 Dec-26 March

2023-2024

Full Stack Developer

- Collaborated with senior developers and learned various new things.
- Led the development of scalable and maintainable web applications using a diverse tech stack including Node.js, Express.js, React.js, MongoDB.

PROJECTS

PULSECARE <https://github.com/kashish567/pulsecare.git>

NODEJS | EXPRESSJS | REACT-NATIVE | MONGODB

- Focused on backend development and integration. Features like online appointment scheduling, video calls, maps integration for hospital locations, and a chatbot for quick remedies. Utilized Gemini Vision Pro to convert doctors' prescriptions into a readable format.
- Also made use of APIs like Gemini Vision Pro, AI chatbot & Google Maps

Oscillation 23' Winner,
Finalist in Vega
Hackathon 24'

CHAT APP <chat-app-gamma-rosy-1l.vercel.app>

NODEJS | EXPRESSJS | REACT | MONGODB

- Enabled real-time chat using WebSockets (Socket.io). Developed the backend with Express.js and Node.js. Implemented sending messages, images, and emojis.
